
ECS UPS BATTERY SALES

WHAT TYPE OF BATTERY DO YOU NEED?

Energy Control Systems provides the UPS manufacturer's recommended batteries. The industry standard recommendation is to replace your UPS batteries at least every 3 years. This practice will provide peace of mind that your equipment will be protected, should the power go out.

We routinely research many alternate manufacturers batteries in order to provide the most current and attractive prices to our customer.

We have batteries available for almost any application including:

- GOVERNMENT
- INDUSTRIAL
- COMMUNICATIONS
- EDUCATION
- COMMERCIAL
- POWER BACK UP EQUIPMENT INCLUDING SINGLE PHASE AND THREE PHASE UNITS.
- MILITARY
- FORK TRUCKS

We provide all VRLA as well as wet cell batteries from various battery manufactures including but not limited to:

- C&D
- Energys
- CSB
- Power Battery

We provide batteries for many UPS manufactures including:

- | | | |
|--------------|--------------|------------|
| • Eaton | • Best Power | • MGE |
| • Powerware | • Tripplite | • Liebert |
| • Cyberpower | • Herytage | • GE |
| • Gamatronic | • Toshiba | • Chloride |
| • Chloride | • GE | • APC |

If you do not see a specific UPS or battery manufacture that you need pricing for, please ask us and we will use our extensive resources to locate it for you.

Please ask a representative about our free battery disposal program that complies with EPA guidelines and provides for cradle to grave accountability.
